

# Amplify Intelligence for ISP and Internet Industries

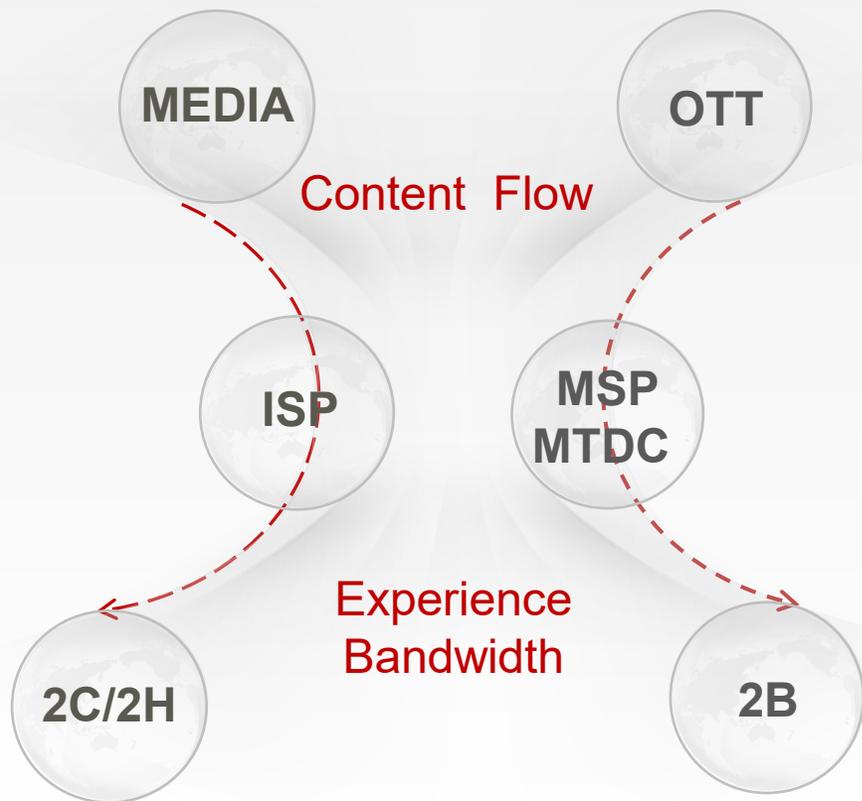

David Hu

CTO of Huawei APAC ISP&OTT Business Unit

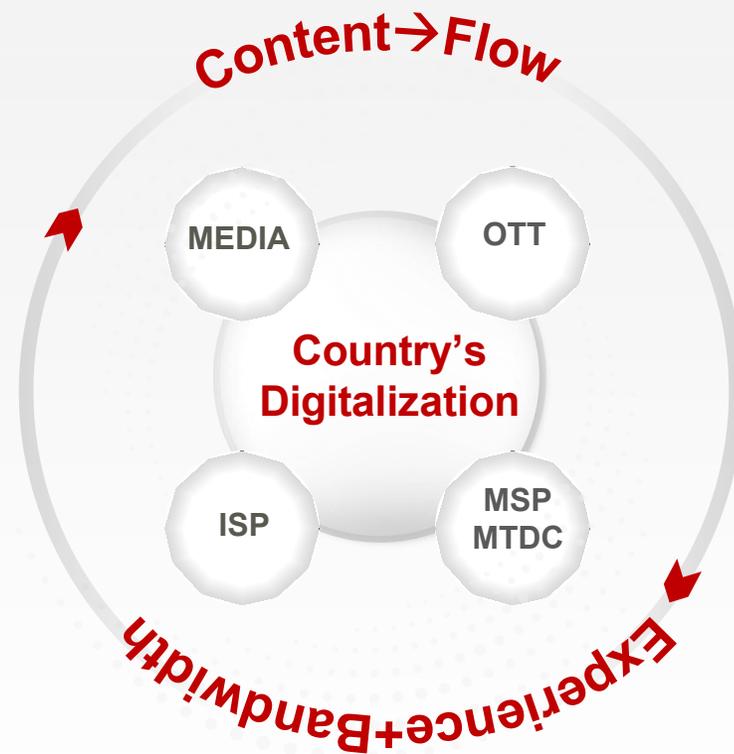

# Industries Integrated and Complementary

## Integrated and Complementary

## Boosting Country's Digitalization

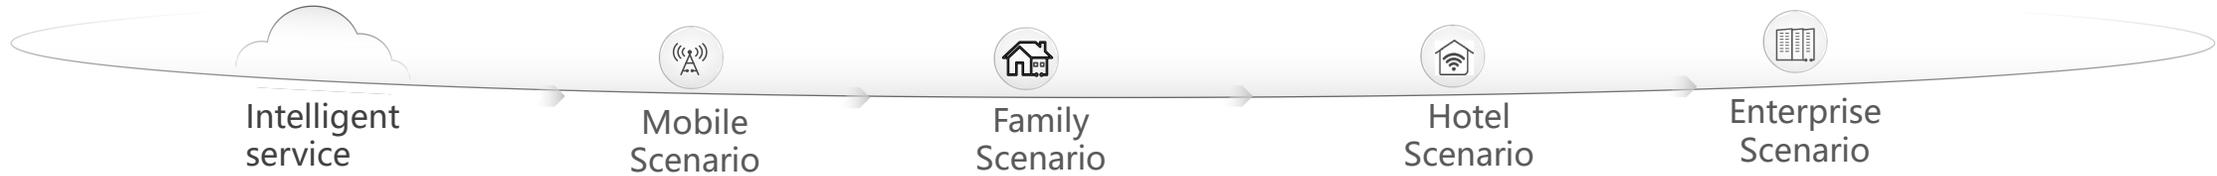

# The Next Two Decades

## The Past Two Decades Accomplished Amazing Feats

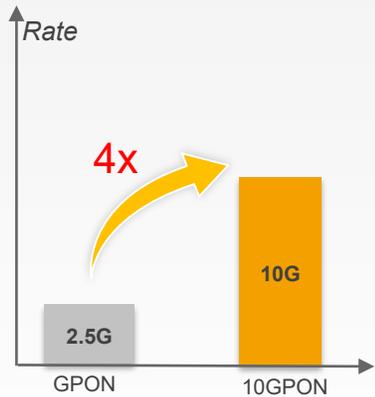

- 1. Improve Experience by Fast and Stable Connectivity.
- 2. Improve Resilience By Enhance ICT Infrastructure
- 3. Embrace AI Build Intelligent Media

# Improve Experience by Fast and Stable Connectivity

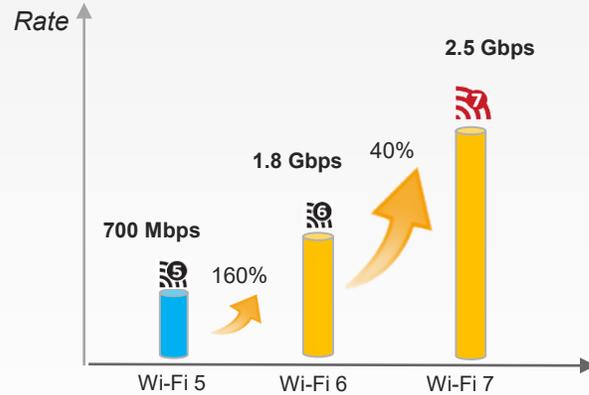

## Fast Broadband

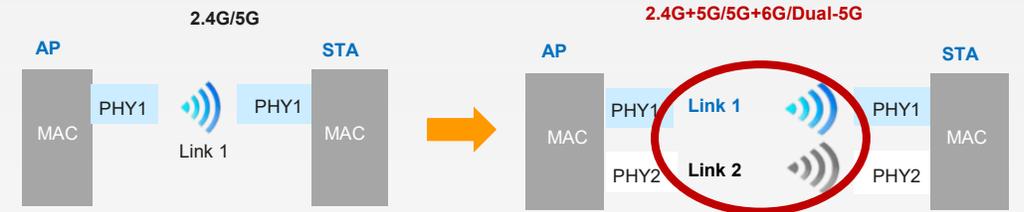

GPON → 10GPON

Wi-Fi 5 → Wi-Fi 6/7

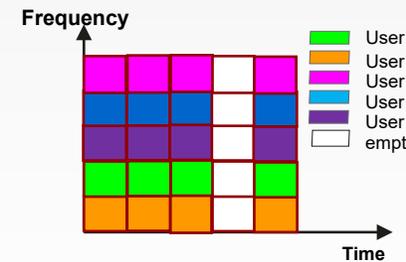

## Stable Connectivity

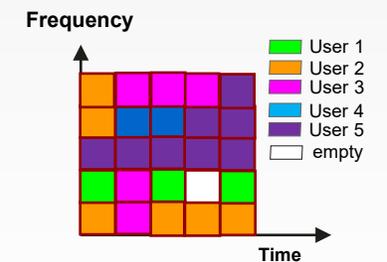

Wi-Fi 5/6 single connection

Wi-Fi 7 dual connectivity

Wi-Fi 6 S-RU per user

anti-interference

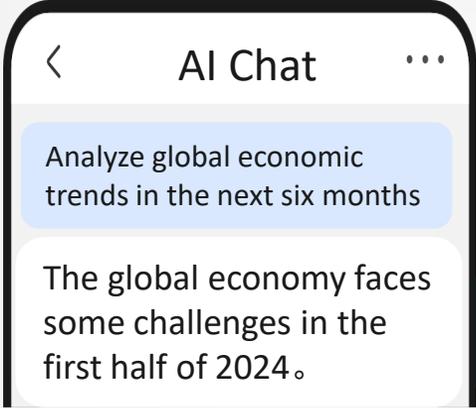

Wi-Fi 7 Multi-RU per user  
Maximize resource utilization

# Improve Resilience By Enhance ICT infrastructure

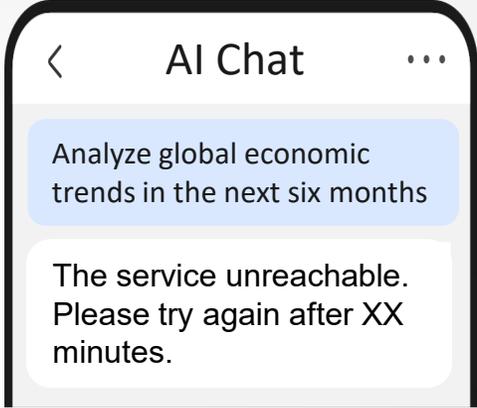

## Tolerable precision, not tolerable reliability

**AI Precision**

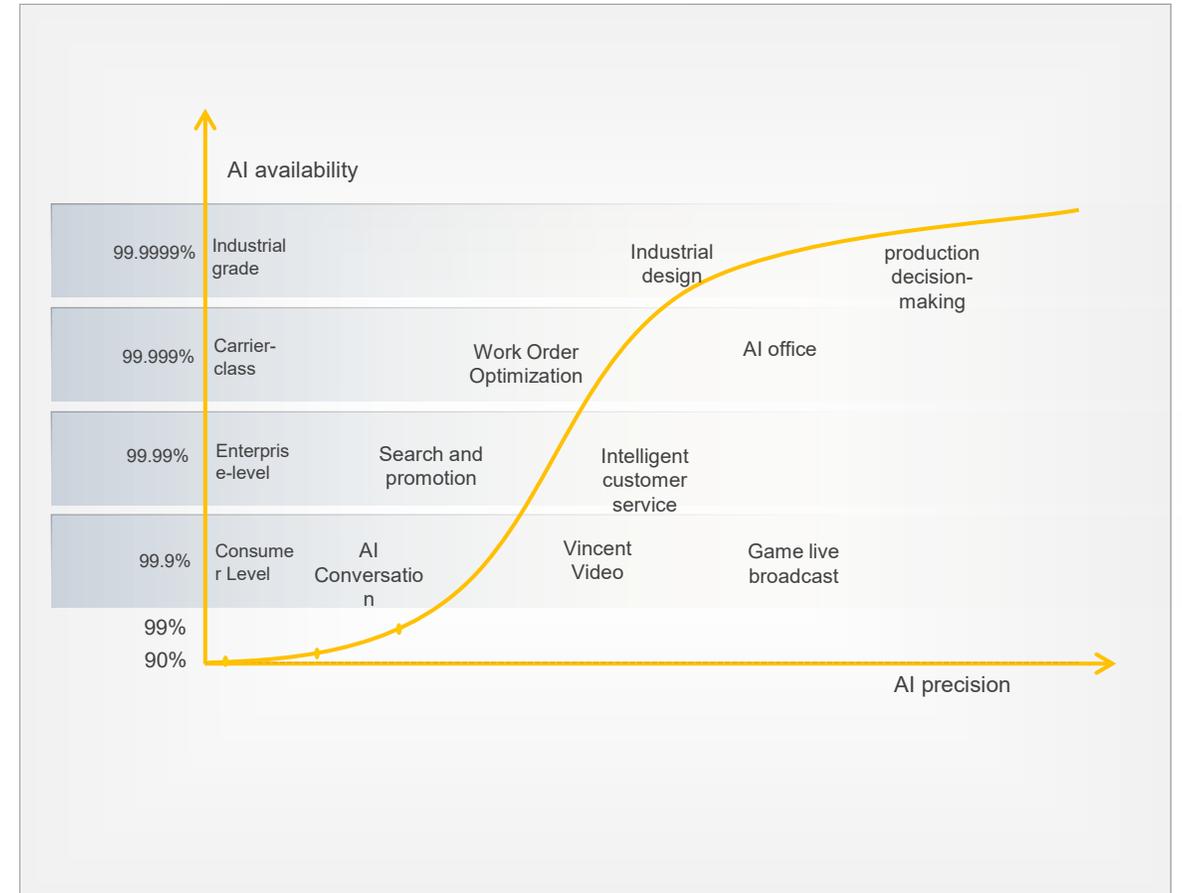

Users can tolerate the large model's bias in judging some market forms.

**AI Reliability**

But what we can't tolerate is the sudden EOS for X hours for securities analysis and intelligent analysis

## Precision and Availability Requirements in AI Scenarios

# Embrace AI and Build Intelligent Media

To 2030  
**About 90%**  
Content will be generated by AI

## AIGC Creates New Value for the Media Industry

Lower cost

Better quality

Shorter cycle

Wider communication

**Let's Work Together to Amplify Intelligence for  
ISP and Internet Industries.**
